

Puro.earth CO₂ Removal Marketplace Output Audit Statement

Statement No.	Date of Issue	Validity Period
006 - A	27 August 2024	1 October 2022 to 31 October 2023

EnergyLink Services have verified the CO₂ removal achieved by the following organisations (the audited bodies) in accordance with the Puro Standard General Rules Version 3.1 (the Puro Rules) for the calculation of CO₂ Removal Certificates (CORCs) for the reporting period of 1 October 2022 to 31 October 2023 for the **Primary Biochar** production.

Facility Operator	Puro.earth Project Proponent
<i>Oregon Biochar Solutions</i> 	<i>GECA Environnement</i> 

The results of the Output Audit are reported in the document titled Oregon Biochar Solutions Output Audit Report and relates to the activities carried out at the Production Facility name: Oregon Biochar Solutions (ID: 753518), located at 2350 Avenue G, White City – Oregon, United States.

During the reporting period, two different biochar streams were produced in the Oregon Biochar Solutions Production Facility. As such, two Output Audit Statements were issued, these are:

- **Output Audit Statement 006 – A:** which relates to the high carbon content biochar produced. This biochar stream is classified by Oregon Biochar Solutions as *Powder Biochar* and *Rogue Biochar* (hereafter referred to as “Primary Biochar”).
- **Output Audit Statement 006 – B:** which relates to the low carbon content biochar produced and screened from the primary biochar output. This biochar stream is classified by Oregon Biochar Solutions as *Biochar Screenings* (hereafter referred to as “Secondary Biochar”).

Output Audit

EnergyLink Services have verified that the calculation of CO₂ removal achieved through the production of **Primary Biochar** for the period 1 October 2022 to 31 October 2023 has been prepared in accordance with Puro.earth Biochar Methodology (the Biochar Methodology).

Attachment to the Output Audit Statement

Stream	Reporting Period	Eligible CO ₂ Removal	Eligible CORCs
Primary Biochar	1 October 2022 to 31 October 2023	1.803 tCO ₂ e per dry tonne biochar	1,937

Verification Objective

EnergyLink Services was engaged to conduct an audit to validate that the audited bodies' calculation of CO₂ Removal Certificates (CORCs) from the production of biochar for the period 1 October 2022 to 31 October 2023 had been prepared in accordance with the Biochar Methodology and with reference to the eligibility requirements for a Production Facility.

Verification Scope

Output Audit of the **Primary Biochar** production for the period 1 October 2022 to 31 October 2023 under the Biochar Methodology.

Verification Level of Assurance

The verification was conducted by EnergyLink Services with a reasonable level of assurance. A reasonable assurance engagement in accordance with ISAE 3000 involves performing procedures to obtain evidence about the Production Facility process controls and the quantification of CO₂ Removal in accordance with the Puro Standard General Rules Version 3.1 (the Puro Rules).

There are inherent limitations in performing assurance - for example, assurance engagements are based on selective testing of the information being examined - and because of this, it is possible that fraud, error, or non-compliance may occur and not be detected. An assurance engagement is not designed to detect all misstatements, as an assurance engagement is not performed continuously throughout the period that is the subject of the engagement and the procedures are performed on a test basis. The conclusion expressed in this statement has been formed on the above basis.

Verification Criteria

The requirements applicable to the organisation are the stipulated in the Puro Rules.
