

Puro.earth CO₂ Removal Marketplace

Output Audit Statement

Statement No.	Date of Issue	Validity Period
002	19 December 2023	1 July 2022 to 31 May 2023

During the reporting period, the biochar produced by **Wakefield Biochar (Foley)** was sold to two different end-uses, these are:

- **Direct Farm Application:** which relates to biochar shipped from the Production Facility and directly applied on land in farm located nearby the Production Facility.
- **Retail and Bulk Sales:** which relates to the biochar shipped to Wakefield Innovation Center (WIC) to be further processed and packed, prior to be sold in the retail and bulk markets across the United States as soil amendment.

EnergyLink Services have verified the CO₂ removal achieved by the following organisations (the audited bodies) in accordance with the *Puro.earth CO₂ Removal Marketplace General Rules v3.1* for the calculation of CORCs from the reporting period of 1 July 2022 to 31 May 2023:

Facility Operator	Puro.earth Project Proponent
<i>Wakefield Biochar</i>  Wakefield BioChar TM	<i>Accend AS</i> 

The result of the Production Facility and Output Audit is reported in the document titled Wakefield Biochar - 001 Foley Audit Report and relates to the activities carried out at the following site:

Wakefield Biochar – Facility 1 (Foley), GSRN: 643002406801000725 located in Perry, FL – the United States.

Output Audit

EnergyLink Services have verified that the calculation of CO₂ removal achieved through the production of biochar for the period 1 July 2022 to 31 May 2023 has been prepared in accordance with the Puro.earth Biochar Methodology.

Attachment to the Statement

Reporting Period	Eligible CO ₂ Removal	Buffer
1 July 2022 to 31 May 2023	1.463 tCO ₂ -e per dry tonne biochar	N/A.

Verification Objective

EnergyLink Services was engaged to conduct an audit to validate that the audited bodies' calculation of CO₂ Removal from the production of biochar for the period 1 July 2022 to 31 May 2023 had been prepared in accordance with the Puro.earth Biochar Methodology and with reference to the eligibility requirements for a Production Facility.

Verification Scope

- Output Audit for the period 1 July 2022 to 31 May 2023 under the **biochar** CO₂ removal methodology: *Puro.earth CO₂ Removal Marketplace General Rules v3.1*.

Verification Level of Assurance

The verification was conducted by EnergyLink Services with a reasonable level of assurance. A reasonable assurance engagement in accordance with ISAE 3000 involves performing procedures to obtain evidence about the Production Facility process controls and the quantification of CO₂ Removal in accordance with *General Rules of the Puro.earth CO₂ Removal Marketplace*. There are inherent limitations in performing assurance—for example, assurance engagements are based on selective testing of the information being examined—and because of this, it is possible that fraud, error, or non-compliance may occur and not be detected. An assurance engagement is not designed to detect all misstatements, as an assurance engagement is not performed continuously throughout the period that is the subject of the engagement and the procedures are performed on a test basis. The conclusion expressed in this statement has been formed on the above basis.

Verification Criteria

The requirements applicable to the organisation are the *Puro.earth CO₂ Removal Marketplace General Rules* v3.1 for the reporting period of 1 July 2022 to 31 May 2023.
