

Puro.earth CO₂ Removal Standard and Registry

Output Audit Statement

Statement No.	Date of Issue	Validity Period
007-A	17 November 2025	01 November 2023 to 30 September 2024

EnergyLink Services have verified the CO₂ removal achieved by the following organisations (the audited bodies) in accordance with the *Puro.earth CO₂ Removal Marketplace General Rules v3.1* for the calculation of CORCs from the reporting period of 01 November 2023 to 30 September 2024 for the **Primary Biochar** production:

Facility Operator	Puro.earth Project Proponent
<i>Oregon Biochar Solutions</i> 	<i>GECA Environnement</i> 

The result of the Output Audit is reported in the document titled Oregon Biochar Audit Report and relates to the activities carried out at the Production Facility Name: Oregon Biochar Solutions (ID: 753518), located at 2350 Avenue G, White City – Oregon, United States.

During the reporting period, two different biochar streams were produced in the Oregon Biochar Solutions Production Facility. As such, two Output Audit Statements were issued, these are:

- **Output Audit Statement 007 – A:** which relates to the high carbon content biochar produced. This biochar stream is classified by Oregon Biochar Solutions as *Powder Biochar* and *Rogue Biochar* (hereafter referred to as “Primary Biochar”).
- **Output Audit Statement 007 – B:** which relates to the low carbon content biochar produced and screened from the primary biochar output. This biochar stream is classified by Oregon Biochar Solutions as *Biochar Screenings* (hereafter referred to as “Secondary Biochar”).

Output Audit

EnergyLink Services have verified that the calculation of CO₂ removal achieved through the production of biochar for the period 01 November 2023 to 30 September 2024 has been prepared in accordance with the Puro.earth Biochar Methodology.

Attachment to the Statement

Reporting Period	Eligible CO ₂ Removal	Eligible CORCs
01 November 2023 to 30 September 2024	1.775 tCO ₂ e per dry tonne biochar	3,476.92

Verification Objective

EnergyLink Services was engaged to conduct an audit to validate that the audited body’s calculation of CO₂ Removal from the production of biochar for the period 01 November 2023 to 30 September 2024 had been prepared in accordance with the Puro.earth Biochar Methodology and with reference to the eligibility requirements for a Production Facility.

Verification Scope

Output Audit for the period 01 November 2023 to 30 September 2024 under the biochar CO₂ removal methodology edition 2022 v3: *Puro.earth CO₂ Removal Marketplace General Rules v3.1*

Verification Level of Assurance

The verification was conducted by EnergyLink Services with a reasonable level of assurance. A reasonable assurance engagement in accordance with ISAE 3000 involves performing procedures to obtain evidence about the Production Facility process controls and the quantification of CO₂ Removal in accordance with *General Rules of the Puro.earth CO₂ Removal Marketplace*. There are inherent limitations in performing assurance—for example, assurance engagements are based on selective testing of the information being examined—and because of this, it is possible that fraud, error, or non-compliance may occur and not be detected. An assurance engagement is not designed to detect all misstatements, as an assurance engagement is not performed continuously throughout the period that is the subject of the engagement, and the procedures are performed on a test basis. The conclusion expressed in this statement has been formed on the above basis.

Verification Criteria

The requirements applicable to the organisation are the *Puro.earth CO₂ Removal Marketplace General Rules v3.1* for the reporting period of 01 November 2023 to 30 September 2024.
