

Puro.earth CO<sub>2</sub> Removal Standard and Registry  
Periodic Output Audit Statement

Statement No.	Date of Issue	Validity Period
004	17 December 2025	1 January 2025 to 30 September 2025

EnergyLink Services have verified the CO<sub>2</sub> removal achieved by the following organisations (the audited bodies) in accordance with the *Puro Standard General Rules v3.1* for the calculation of CORCs from the reporting period of 1 January 2025 to 30 September 2025:

Facility Operator	Puro.earth Project Proponent
<i>Wakefield Biochar</i> 	<i>Accend AS</i> 

The result of the Output Audit is reported in the document titled Brunswick Output Audit Report 2025 and relates to the activities carried out at the Production Facility Name: Wakefield Biochar Facility 2 (Brunswick), Facility ID: 244045, located in Brunswick, GA – United States.

### Output Audit

EnergyLink Services have verified that the calculation of CO<sub>2</sub> removal achieved through the production of biochar for the period 1 January 2025 to 30 September 2025 has been prepared in accordance with the Puro.earth Biochar Methodology.

# Attachment to the Statement

Reporting Period	Eligible CO <sub>2</sub> Removal	Eligible CORCs
1 January 2025 to 30 September 2025	0.905781664tCO <sub>2</sub> e per dry tonne biochar	3,643.86

## Verification Objective

EnergyLink Services was engaged to conduct an audit to validate that the audited body’s calculation of CO<sub>2</sub> Removal Certificates from the production of biochar for the period 1 January 2025 to 30 September 2025 had been prepared in accordance with the Puro.earth Biochar Methodology and with reference to the eligibility requirements for a Production Facility.

## Verification Scope

Output Audit for the period 1 January 2025 to 30 September 2025 under the Biochar CO<sub>2</sub> Removal Methodology.

## Verification Level of Assurance

The verification was conducted by EnergyLink Services with a reasonable level of assurance. A reasonable assurance engagement in accordance with ISAE 3000 involves performing procedures to obtain evidence about the Production Facility process controls and the quantification of CO<sub>2</sub> Removal in accordance with *Puro Standard General Rules*. There are inherent limitations in performing assurance—for example, assurance engagements are based on selective testing of the information being examined—and because of this, it is possible that fraud, error, or non-compliance may occur and not be detected. An assurance engagement is not designed to detect all misstatements, as an assurance engagement is not performed continuously throughout the period that is the subject of the engagement and the procedures are performed on a test basis. The conclusion expressed in this statement has been formed on the above basis.

## Verification Criteria

The requirements applicable to the organisation are the *Puro Standard General Rules*v3.1 for the reporting period of 1 January 2025 to 30 September 2025.
